Sprint 1 primarily focused on the **design and planning phase of the system**, specifically the **creation of UI/UX wireframes, prototypes, and interface layouts** for the core user features. The team developed screen designs for user login, profiles, history, requests, reports, and different user role views (student, organization, and admin). In addition to the interface mockups, the team also initiated the **database schema and structure planning** to support future development.

Sprint Retrospective:

What went well:

- The UI/UX mockups and prototypes were completed on time.
- Tasks were clearly assigned and finished by all members.
- Collaboration and communication went well.
- Team members were aligned with the requirements.

What could be improved:

- Everything went well, and there weren't any significant issues to address.

What needs to be done (sprint 1):

- Apply revisions only if any suggestions or feedback are given..
- The team is now ready to move forward to Sprint 2.
